

M530

A Heavy-Duty, All-Electric Solution for Controlling Vehicle Traffic and Securing Assets

OVERVIEW

The M530 by Apex Fabrication is an ASTM M30/P1, crash tested, bolt-down arm barrier. The heavy-duty, electro-mechanical drive system provides low-maintenance, high-cycle performance wherever traffic control is needed.

OPTIONS

- ▶ Custom paint colors to match customer requirements
- ▶ Integrated red & amber LED traffic lights
- ▶ Solar-powered flashing warning lights on arm
- ▶ Battery back-up
- ▶ Master and remote push-button stations
- ▶ A complete access control solution

INSTALLATION

The M530 can be professionally installed by our in-house technicians or contracting partners. This will ensure the highest quality installation and best service throughout the project.

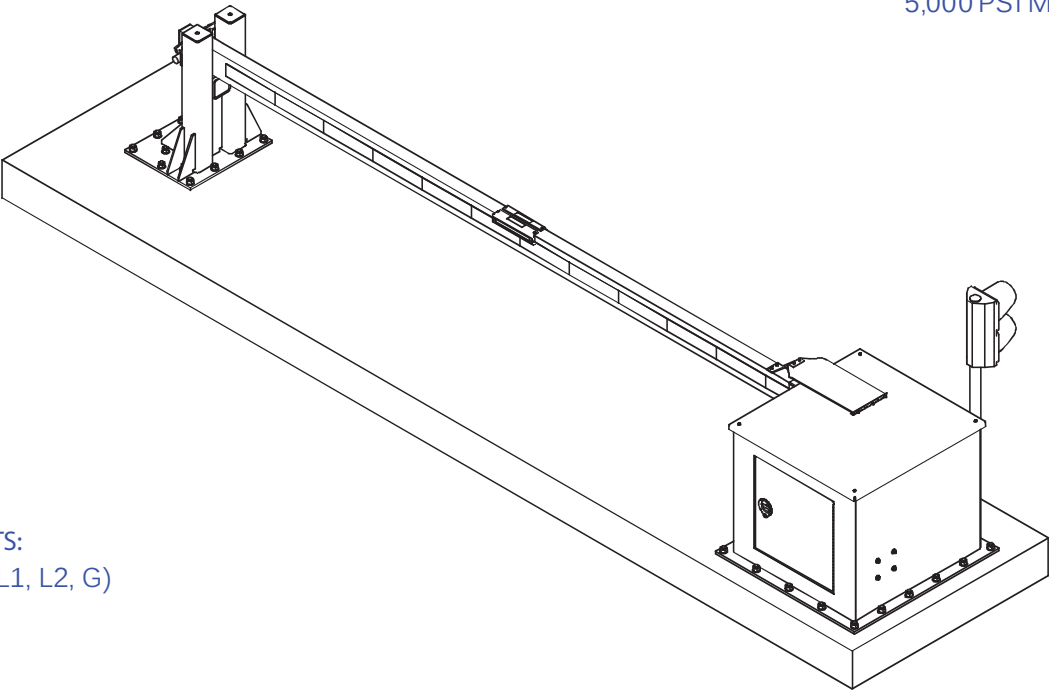

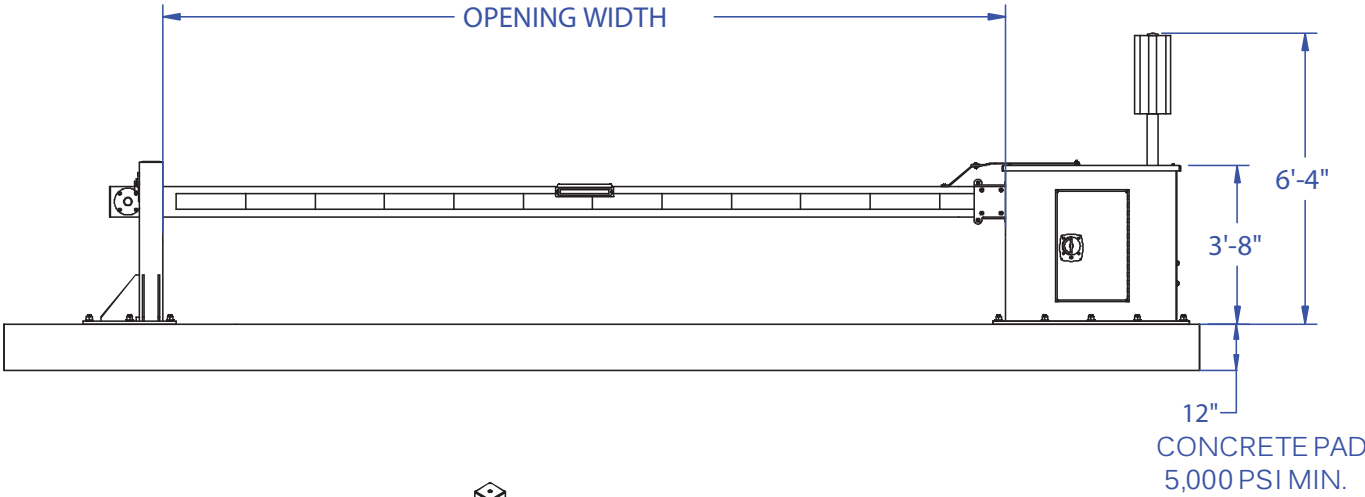

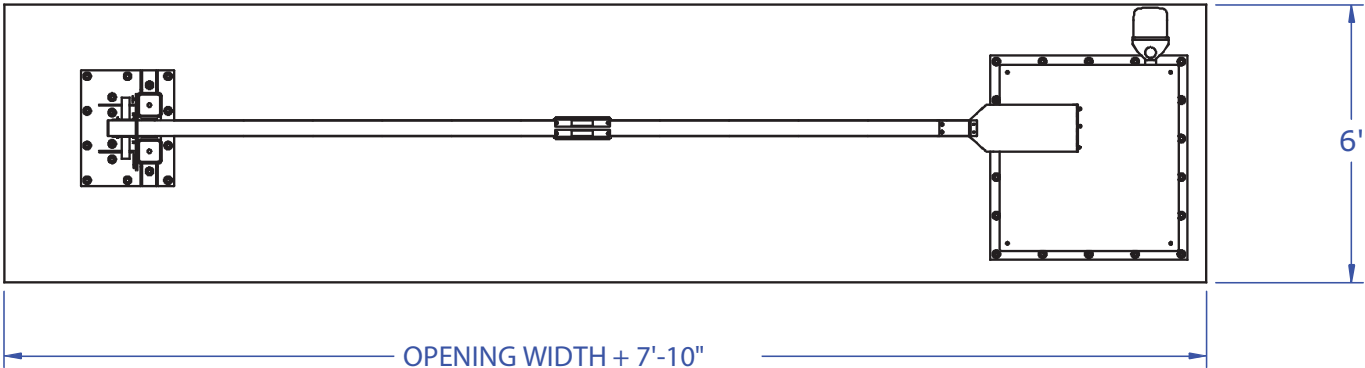

FEATURES

- ▶ All-electric, no hydraulics
- ▶ M30/P1 crash tested for openings of 12 ft and 22 ft, with larger openings also available
- ▶ Both 12" shallow mount & deep mount foundation solutions
- ▶ Bolt-down design allows for future relocation
- ▶ Dual Channel Loop Detector can be used for auto-close and/or safety
- ▶ Operates on 208-240VAC / 20A (L1, L2, G)
- ▶ Easily integrates into 3rd party access control equipment
